

Assignment Java Basic
Date: 23/06/2020 Name: D.Saravanan

1. Write a Java program to get name and age from the user and display the name in uppercase and half of the age.

Program:

```
/* File: program.java
 * Name: D.Saravanan
 * Date: 23/06/2020
 * Comt: Java program to get user name and age and display it
 */

import java.util.Scanner;

public class program {

    public static void main(String args[]) {

        Scanner uname = new Scanner(System.in);
        Scanner uage = new Scanner(System.in);

        System.out.println("\nEnter Name: ");
        String name = uname.nextLine();
        System.out.println("\nEnter Age: ");
        byte age = uage.nextByte();

        System.out.println("\nName: " + name.toUpperCase());
        System.out.println("Half-Age: " + (byte) age/2);

    }
}
```

Output:

```
Enter Name:
Akshay Venkatesh

Enter Age:
38

Name: AKSHAY VENKATESH
Half-Age: 19
```
